

# THE SOIL ENJOYS OUR COMPANY

☎ (800) 583-7702

www.earthsoils.com

Earthsoils® brings you a powerful line of high-quality, ecologically-based fertilizers. We believe there is no need to compromise crop quality, profits, or ecology when choosing products for your farm. We invite you to learn about the Earthsoils® program: its power to revitalize soils, its ability to generate high yields and healthier crops, its commitment to animal health and the safety of our environment.

## OUR INTENT

We believe nature is the one true expert in soil and plant fertility. It is our responsibility to take care of this planet. Earthsoils® strives to be a major contributor in helping heal the earth and our products reflect our intent. We believe in providing our customers throughout the world with products and programs that are environmentally responsible, result oriented, convenient to use, and economically priced. Learn about why "The Soil Enjoys Our Company."

### Custom programs

Timing, rate and placement all influence nutrient availability. Making fertilizer accessible to roots at critical growth periods is essential for establishing healthy, vibrant plants.

### Nutrient toolbox

Earthsoils® offers a comprehensive line of products that address the needs of your soil and crops. We offer a comprehensive line of products that address soil and plant needs across diverse environments.

### Timely deliveries

We pride ourselves in delivering product when and where you need it. Our drivers are courteous and conscientious and go the extra mile, literally, to get the product delivered.

### Customer service

Products and programs are only part of the story. We care about your vision for the future. Establish an intent and let us help you farm to your best potential.

Your soil is a **living system** that has the capacity to sustain biological productivity. Properly managed, it has the framework needed to improve air and water quality as well as maintain *plant, animal, and human health*. We are all part of the same system

# Soil Health is Our Primary Focus

*Unleash the power and productivity beneath your feet*

☐ (800) 583-7702 **EARTH SOILS™**  
www.earthsoils.com

At Earthsoils®, we believe that information is the foundation to effective and responsible nutrient management. Each program is customized to your field and associated goals, which involves knowledge of a wide range of information.

Soil testing is an important piece of the puzzle, but other factors such as soil type, moisture conditions, pH, soil organic matter, crop and crop rotations, pest challenges, cultural practices, environmental stressors, and other management items are used to develop a strong nutrient foundation.

## FOUNDATION

### 4-15-15-XLS Plant Food

There is a reason why it's called plant food, we are doing exactly that. Providing the proper nutrients from the start of a plant's life is key. Building a strong foundation (AKA root mass) to feed a developing plant.

### 9-0-0-9 ES-CAL or "Calcium"

Our calcium is blend of a uniquely available, natural source of calcium, which is a building block to plant roots, thus improving overall plant vigor.

## MICRONUTRIENTS

**Micro-Mix** is a carbon-based, reproductive support package that combines a series of primary, secondary, and micro-nutrients that support the natural reproductive function of many plants.

**3% Boron** helps build cell walls & and aids in plant immunity to key stresses

**3% Magnesium** provides the building block of chlorophyll and helps increase photosynthetic efficiency

**3% Manganese** aids in the conversation of nitrogen to useable forms by the plant

**5% Iron** plays a role in metabolic processes such as DNA synthesis, respiration, and photosynthesis

## SPECIALTY PRODUCTS

**K-SUL** Sulfur is essential for plant growth and functioning. structure of proteins and functioning of enzymes

**ALFA-MAX** (0-15-15) is specially formulated to fortify and strengthen your alfalfa.

**N-CAL (19-0-0-2)** provides a clean source of nitrogen without the high salt content

**MpH** is a carbon-based chelator that brings down high-pH water.
